Django Booking is a Complete Django booking system.

what you get:

- A booking page which users can book appointments.
- A dashboard which the admin can see the appointments and make actions

REQUIREMENTS

Django Booking requires Django 3 or later.

GETTING IT

Python package:

```
$ pip install dj-booking
```

INSTALLING IT

To enable *dj-booking* in your project you need to add it to *INSTALLED_APPS* in your projects *settings.py* file:

```
INSTALLED_APPS = (  
    ...  
    'booking',  
    ...  
)
```

And include *dj-booking* to your URLs:

```
from django.urls import path, include  
  
urlpatterns = (  
    ...  
    path("booking/", include("booking.urls")),  
    ...  
)
```

USING IT

```
$ python manage.py migrate $ python manage.py runserver
```

then you can visit the pages:

- Booking page: <http://localhost:8000/booking>
- Admin page: <http://localhost:8000/booking/admin>

CONFIGURATION

Add this vars to settings.py

```
BOOKING_TITLE = "Your title" BOOKING_DESC = "Your description" BOOKING_BG =  
"img/booking_bg.jpg"
```

```
BOOKING_SUCCESS_REDIRECT_URL = "Success redirect url" BOOKING_DISABLE_URL =  
"Redirect to this url if create booking is disable"
```

GETTING INVOLVED

Open Source projects can always use more help. Fixing a problem, documenting a feature, adding translation in your language. If you have some time to spare and like to help us, here are the places to do so:

- GitHub: <https://github.com/foad-heidari/dj-booking>

DOCUMENTATION

You can view the documentation online at:

- <https://dj-booking.readthedocs.io>
- <https://pypi.org/project/dj-booking>

Or you can look at the docs/ directory in the repository.

SUPPORT

Django Booking is free and always will be. It is developed and maintained by developers in an Open Source manner. Any support is welcome. You could help by writing documentation, pull-requests, report issues and/or translations.

CONTENTS

9.1 Overview

9.1.1 Requirements

- Python 3.5, 3.6, 3.7, 3.8 or 3.9
- Django (2.0+)

9.1.2 Supported Flows

- Create a new booking
- Manage bookings
- Approve or Remove each appointment
- Overview of bookings
- List of all booking
- Able to limit booking for each day or each time

9.2 Installation

9.2.1 dj-booking

Python package:

```
pip install dj-booking
```

settings.py

```
INSTALLED_APPS = [  
    ...  
    'booking',  
    ...  
]
```

urls.py:

```
urlpatterns = [
    ...
    path('booking/', include('booking.urls')),
    ...
]
```

9.2.2 Post-Installation

In your Django root execute the command below to create your database tables:

```
python manage.py migrate
```

Now start your server, and you can visit the pages (e.g. <http://localhost:8000/booking/> and <http://localhost:8000/booking/admin>)

9.3 Configuration

Available settings:

BOOKING_TITLE: Title of create booking page

BOOKING_DESC Description of create booking page

BOOKING_BG Background image for create booking page

BOOKING_SUCCESS_REDIRECT_URL Success redirect url for create booking page

BOOKING_DISABLE_URL Redirect to this url if create booking is disable

Usage:

Add this vars to settings.py

```
BOOKING_TITLE = "Your title"
BOOKING_DESC = "Your description"
BOOKING_BG = "img/booking_bg.jpg"

BOOKING_SUCCESS_REDIRECT_URL = "Success redirect url"
BOOKING_DISABLE_URL = "Redirect to this url if create booking is disable"
```
